

Frontend Open-Source Programs Playbook

Oct 8, 2026 · @Akshat Kansal

Strategy in one screen

Pick ONE primary org that runs in several programs, get 3–5 merged frontend PRs there by February 2027, and apply to every program it joins. One body of work can then count for GSoC, LFX, Outreachy and C4GT.

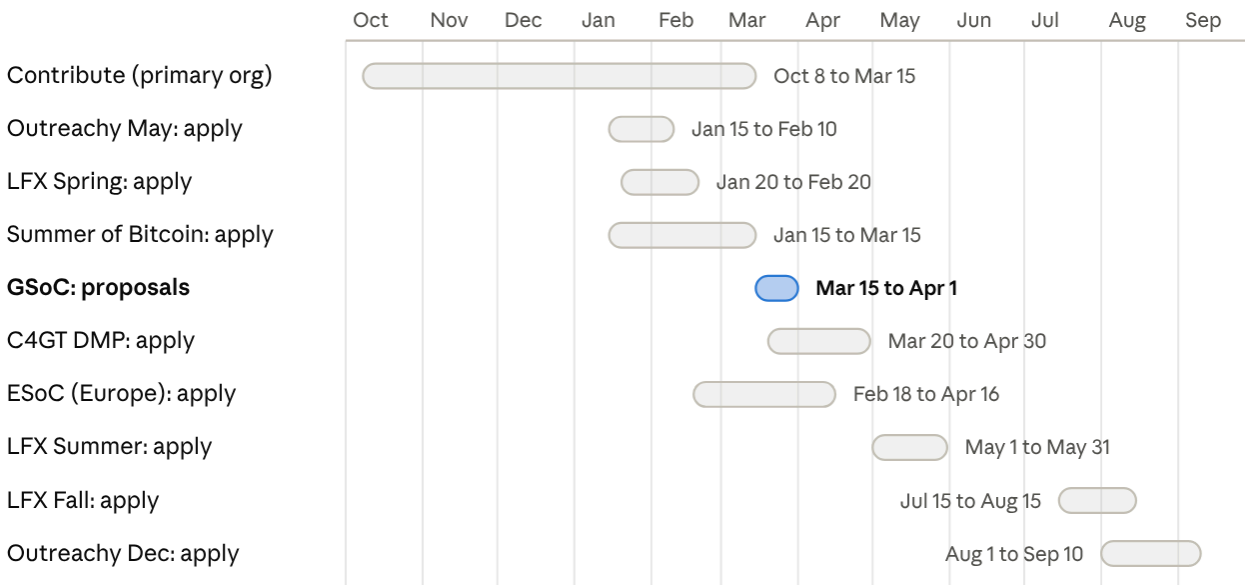

- **Primary target:** Layer5 / Meshery (React + Next.js). *Programs: GSoC, LFX, Outreachy.* One set of contributions works for all three.
- **Backup target:** one org in your second stack. CircuitVerse (Vue; GSoC) or Oppia (Angular; GSoC).
- **Low-competition track:** a C4GT DMP org. Glific, Avni or DIGIT (React; C4GT), India-focused and less crowded.
- **Stretch:** Zulip (GSoC, Outreachy) or Rocket.Chat (GSoC), once you have 2+ merged PRs elsewhere.
- **Rule of thumb:** depth in one codebase beats one PR each in ten. Mentors pick people they already know from issues and PRs.

Dates and stipends below are approximate, based on past cycles. Confirm each on the program's official site before acting on it.

Timeline

Contribute now; most application windows open Jan to Apr 2027

Approximate windows from past cycles, Oct 2026 to Sep 2027

MLH Fellowship runs rolling batches all year. Confirm every date on the official site.

application windows by program, Oct 2026 – Sep 2027

October to February is for contributing. January to April 2027 is when most applications are due, and GSoC proposals (mid-March to early April) are the main deadline.

Programs

GSoC and LFX have the most frontend slots. Outreachy and C4GT are the easiest to stand out in. Summer of Bitcoin and MLH are side bets.

Program	Who can apply	Stipend (approx.)	Application window (approx.)	Frontend scope	How selection works
GSoC	18+, students and open-source beginners	~\$750–\$3,300, scaled by country and project size	Orgs announced ~late Feb; proposals ~mid-Mar to early Apr	High: dashboards, design systems, editors, accessibility, React/Vue/Angular rewrites	Prior PRs + a proposal reviewed by org mentors

Program	Who can apply	Stipend (approx.)	Application window (approx.)	Frontend scope	How selection works
LFX Mentorship	18+, anyone	~\$3,000–\$6,600 by location	3 terms: Spring (apply ~Jan–Feb), Summer (~May), Fall (~Jul–Aug)	Medium–high: CNCF UIs (Meshery, Headlamp, Backstage plugins, KubeVela)	Cover letter + resume + a test task; prior PRs help a lot
C4GT DMP	Students and professionals, India-focused	Paid during DMP (amount varies by year)	Tickets published ~Mar–Apr; program ~May–Aug	Medium–high: React, React Native and Angular tickets on govtech products	Apply per ticket; proposal + prior contributions
Outreachy	People underrepresented in tech; initial essay required	\$7,000	2 rounds: May cohort (apply ~Jan–Feb), Dec cohort (apply ~Aug–Sep)	Medium: web projects at Wikimedia, Mozilla, GNOME, Fedora and others	Essay approval, then a ~4-week contribution period; contributions decide it
Summer of Bitcoin	University students	Paid (~\$3,000 in past years)	2026 applications closed Feb 15; expect ~Jan–Feb 2027	Low–medium: wallet and Nostr app UIs; a separate designer track (6 of 50 places in 2026)	Bitcoin + coding challenge rounds, then a proposal to one of ~26 orgs
MLH Fellowship	Students and early-career developers	Stipend in some tracks	Rolling batches every few months, 12 weeks each	Medium: Open Source and Software Engineering tracks; past partners include React, Jest and DEV	Application + technical interview; MLH matches you to a project, you don't pick the org
ESoC: European Summer of Code	Open-source newcomers worldwide	Stipend (amount varies by project)	2026 batches ~Feb–Apr; check esoc.dev for 2027	Low: mostly Python, ML and data libraries; frontend only via docs sites or dashboards	Apply per project; regional hubs in Europe do the matching

Org directory

React/TypeScript orgs have the most openings. Vue and Angular orgs get fewer applicants per slot. Program participation changes every year, so check the current org list before committing.

Org	Stack	Programs (past years)	Frontend scope	Competition
Layer5 / Meshery	React, Next.js, MUI, Sistent design system	GSoC, LFX, Outreachy	Meshery UI, Kanvas designer, Sistent components, docs site	Medium
Zulip	TypeScript, Handlebars; React Native (mobile)	GSoC, Outreachy	Web app UI, settings, accessibility, mobile app	Very high
Rocket.Chat	React, TypeScript, Fuselage UI	GSoC	Chat UI, admin panels, apps engine UI	High
Mattermost	React, TypeScript, Redux	GSoC (some years)	Web app features, plugins	High
Joplin	React, TypeScript, Electron, React Native	GSoC	Desktop/mobile note-app UI, editor	Medium-high
Wikimedia	Vue 3 (Codex design system), vanilla JS	GSoC, Outreachy	Codex components, tool UIs, accessibility	Medium
Apache Superset	React, TypeScript	GSoC (via ASF)	Charts, dashboard builder	High
Jenkins	JavaScript, React (plugins)	GSoC, LFX (CDF)	Plugin UIs, design-library migration	Medium
Backstage	React, TypeScript, MUI	LFX (CNCF)	Plugins, core UI	Medium
Headlamp	React, TypeScript	LFX (CNCF)	Kubernetes dashboard, plugins	Low-medium
CircuitVerse	Vue 3, TypeScript; Rails	GSoC	Simulator UI rewrite, Vue frontend	Medium
Oppia	Angular, TypeScript	GSoC	Lesson player, creator tools, accessibility	High

Org	Stack	Programs (past years)	Frontend scope	Competition
OpenMRS	React (O3 micro-frontends), Carbon	GSoC	O3 patient-chart apps	Medium
FOSSology	React (new UI); PHP Symfony (old UI); REST API	GSoC	New React UI (FOSSologyUI): feature parity with the old UI, REST API integration	Low-medium
AOSSIE	React, Flutter	GSoC	Many small apps, new projects each year	Medium
Sugar Labs	JavaScript, TypeScript	GSoC	Music Blocks, activity UIs	Low-medium
p5.js / Processing	React, JavaScript	GSoC	p5.js web editor, accessibility	Medium
Glific	React, TypeScript, Apollo	C4GT	NGO chatbot dashboard	Low-medium
Avni	React, React Native	C4GT	Web app, field app UI	Low-medium
DIGIT (eGov)	React micro-frontends	C4GT	Government service UIs	Low-medium
Mempool.space	Angular, TypeScript	Summer of Bitcoin	Block explorer UI, charts	Medium
BTCPay Server	C#/Razor, JavaScript	Summer of Bitcoin	Merchant dashboard, checkout	Medium
Mozilla	React, JavaScript	Outreachy	Varies by round	Medium

By stack:

- **React/Next.js:** Layer5 (GSoC, LFX, Outreachy) → Headlamp, Backstage (LFX) → Glific (C4GT) → FOSSology (GSoC) → Rocket.Chat, Joplin (GSoC)
- **Vue:** CircuitVerse (GSoC) → Wikimedia Codex (GSoC, Outreachy)
- **Angular:** Oppia (GSoC) → Mempool.space (Summer of Bitcoin)

- **Flutter/React Native:** AOSSIE (GSoC) → Avni (C4GT) → Zulip mobile (GSoC, Outreachy)
- **MLH Fellowship:** matches you to partner projects instead of you picking an org. Any of the orgs above count as experience.

Projects by org

The 2027 idea lists aren't out yet: most orgs publish them between January and February. The 2026 projects below show what each org's mentors fund, so use them to pick the codebase areas to learn now.

Org	Program	Recent projects (2025–2026)	Ideas page
Layer5 / Meshery	GSoC, LFX	2026: docs site migration from Jekyll to Hugo. 2025: Playwright UI tests (LFX), websocket and GraphQL subscription refactor, OPA policy evaluation in the UI via WebAssembly	GSoC 2026 · LFX 2026
Zulip	GSoC	2026: clusters of 3–5 full-stack features (175 or 350 hours). Wants TypeScript, HTML/CSS, visual design and Flutter skills. No small projects.	Zulip GSoC ideas
CircuitVerse	GSoC	2026: Vue Simulator integration, structured format for saved circuits, client-side Verilog synthesis, Organization dashboard with role-based access	GSoC 2026 posts

Org	Program	Recent projects (2025–2026)	Ideas page
Joplin	GSoC	2026: AI search for notes, chat with your notes, auto-categorisation, password strength indicator	Welcome to GSoC 2026
OpenMRS	GSoC	2026 candidates: CDS support in O3, program enrolment in O3, Orders and Lab app improvements	Summer of Code 2026
FOSSology	GSoC	2021: rebuild the PHP Symfony UI in React (FOSSologyUI). 2022: feature parity with the old UI, webpack to Vite migration, REST API fixes. 2026 list not found	GSoC 2022 org.page · FOSSologyUI repo · Good first issues
Rocket.Chat	GSoC	Ideas are posted in their forum; I didn't find the 2026 list	GSoC forum
Oppia	GSoC	One wiki page per year, published January–February; I didn't find the 2026 list	GSoC 2023 page (format)
Wikimedia	Outreachy, GSoC	Each project needs 2 mentors and Phabricator microtasks; Round 33 proposals closed Sep 4, 2026	Outreachy Round 32
CNCF projects (Headlamp, Backstage, Kubeflow and others)	LFX	One project file per term; Term 3 2026 runs Sep–Nov	cncf/mentoring

Org	Program	Recent projects (2025–2026)	Ideas page
C4GT orgs (Glific, Avni, DIGIT and others)	C4GT DMP	Projects listed per ticket with scope and skills	C4GT portal · DMP 2027 guide
Summer of Bitcoin orgs	Summer of Bitcoin	2026: 26 orgs, 44 developer and 6 designer placements. Frontend-leaning orgs: Bitcoin Design, Nostr Components, Shopstr, Formstr, Jam, Cove. Designer track: wallet research, personas, high-fidelity wallet flows	2026 cohort
MLH Fellowship partners	MLH Fellowship	No public project list: you get matched to a project during the application. Over 100 projects a year; past frontend ones include React, Jest and DEV	Open Source track · Partners
ESoC projects	European Summer of Code	2026: pixi, pgmpy, pykalman, pytorch-forecasting, rattler, scikit-base, shap, sktime, skpro, OpenML, AI-on-Demand. Mostly Python and ML, little frontend	esoc2026 repo · esoc.dev

Full list of every GSoC 2026 frontend org and every 2026 LFX frontend project:

All frontend orgs (2026)

Skill roadmap

Learn by fixing real issues in your target org, not by finishing courses first. Each level unlocks a bigger class of issues.

Level	Skills	Unlocks
1. Base	HTML, CSS (Flexbox, Grid, responsive), modern JavaScript, Git (branch, rebase, resolve conflicts)	UI bugs, CSS fixes, docs-site issues
2. Framework	Your org's framework: React + hooks, Vue 3 Composition API, or Angular; TypeScript	Component fixes, small features
3. Project skills	Running a full stack locally (Docker, Node/Go/Python backends), state management (Redux, Zustand, Pinia, RxJS), REST/GraphQL	Features that touch APIs
4. Quality	Testing (Jest/Vitest, Cypress or Playwright), accessibility (WCAG, ARIA, axe), Storybook	Test-coverage and a11y issues mentors value
5. Senior signals	Performance (Lighthouse, bundle size), design-system work, reviewing others' PRs	Proposal-sized projects

Contribution playbook

The goal is for mentors to recognise your name before applications open. Follow these steps in order.

- 1. Shortlist (week 1).** Check past program org lists for your stack. Keep orgs with recent merged PRs, responsive maintainers (replies within ~3 days) and `good first issue` labels.
- 2. Set up (week 1-2).** Join the org's chat (Slack, Zulip, Discord, Matrix). Read CONTRIBUTING.md and the code of conduct. Run the project locally. Write down every setup snag you hit: fixing those docs makes a good first PR.
- 3. First PR (week 2-3).** Ask to be assigned before starting, if the org works that way. Keep the PR small: one bug, one file area. Add before/after screenshots or a GIF for any UI change.
- 4. Climb (month 2-4).** Move from fixes to small features, tests and accessibility work. Review other people's PRs and answer newcomer questions.
- 5. Become known (month 3+).** Attend community calls. Share a short write-up or demo of what you built. Ask mentors which project ideas need doing.

6. Propose (Feb–Apr). Pick a listed idea where you've already touched that code. Share a draft proposal with the mentor 1–2 weeks before the deadline.

Etiquette:

- Never ping maintainers to merge or review. Wait 3–5 days, then follow up once.
- Don't claim more than one issue at a time.
- Don't submit AI-generated PRs you can't explain. Maintainers spot them, and it gets people blacklisted.
- Ask questions in public channels, not DMs, and include what you've already tried.

Proposal template

A strong frontend proposal shows the UI before you build it and proves you already know the codebase. Use this structure and adjust it to the org's own template if it has one.

```
# <Project title> – <Org>

## About me
Name, university/role, timezone, contact, GitHub. Two lines on your frontend background.

## My contributions to <Org>
| PR | What it changed | Status |
|---|---|---|
| #123 | Fixed dashboard layout on mobile | Merged |

## Problem
What is broken or missing today, with screenshots of the current UI.

## Proposed solution
- Mockups (Figma link) of the new UI
- Component tree and state flow
- APIs/data it uses; backend changes needed, if any
- Accessibility, responsiveness and testing plan (unit + e2e)

## Timeline (12 or 22 weeks)
| Week | Deliverable |
|---|---|
| Community bonding | Finalise design with mentors, set up Storybook |
| 1-2 | ... |
| Midterm | Demo-able feature behind a flag |
| Final | Merged, documented, tested |

## Stretch goals
```

```
## Availability
Hours per week, exams, other commitments.

## Why me / why this project
```

Tracker

Tick off these milestones as you go, and log every PR in the table so it's ready to paste into a proposal.

- ☐ Pick primary + backup org (by Oct 20)
- ☐ Project running locally, joined the community chat
- ☐ First PR opened
- ☐ First PR merged
- ☐ 3 merged PRs in primary org
- ☐ Attended a community call / introduced yourself to mentors
- ☐ 5 merged PRs, including one feature or test PR
- ☐ Outreachy initial essay submitted (Jan-Feb round)
- ☐ LFX Spring applications submitted
- ☐ GSoC org list checked (late Feb)
- ☐ Proposal draft shared with mentor
- ☐ GSoC / C4GT / Summer of Bitcoin applications submitted

Date	Org	PR / issue link	What it did	Status	Program it supports

All frontend orgs and projects (2026)

Every GSoC 2026 org with frontend tech or a frontend project, every frontend project in CNCF's three LFX terms of 2026, plus C4GT, Outreachy, Summer of Bitcoin, MLH and ESoC. The Coverage table at the end shows what was checked for each program.

GSoC 2026

75 of GSoC's 185 orgs for 2026 ran at least one frontend project. They're listed roughly by how many frontend projects each had. Each name links to the org's GSoC 2026 page, which lists all its projects.

Org	Frontend tech	2026 frontend projects
FOSSASIA	javascript, reactjs	eventyay tickets as a Vue SPA; eventyay-video SPA with admin dashboards; eventyay-flowspace Vue 3 migration; PSLab desktop + web app; Badge Magic Flutter app; Visdom visualizations
Zulip	javascript, react native, electron, typescript, css, flutter	Improve the UI and visual design of the web app; Flutter client features; accessible integrations
The Mifos Initiative	javascript, angularjs, angular	Mifos X Web App React v2; E2E + unit testing for the web app; financial analytics dashboards
OWASP Foundation	javascript, html, node.js	BLT Next; EoP game in the card browser; DSOMM Angular 13 to 21 migration
Wikimedia Foundation	javascript, html, css, jquery, reactjs	Programs & Events Dashboard metrics; CampWiz Nxt redesign; Scribe conjugation app
cBioPortal for Cancer Genomics	javascript, html, reactjs, typescript	Clinical metadata harmonization dashboard; similarity-map visualization; interactive genomic visualisations
VideoLAN	vue.js	VLC macOS interface redesign; CrashDragon Vue.js frontend

Org	Frontend tech	2026 frontend projects
KDE Community	not tagged	Marknote block editor; KeepSecret UX; translation memory tab redesign; Kdenlive effect widgets (Qt/QML)
Apache Software Foundation	not tagged	Fineract backend-for-frontend + frontend POC; Airavata Custos allocation dashboard UX
International Catrobat Association	javascript, web, flutter	Pocket Paint Flutter (2 projects)
INCF	javascript	BreathState cross-platform app; HarmonyHub mobile app; LORIS electrophysiology browser
UC OSPO	javascript	NSB website; ENTS customizable dashboard; PeerSky P2P browser (mobile)
Open Science Labs	javascript	Alpha One Labs learn platform; DU Event Board discovery UX
FOSSology	jquery, javascript, reactjs	FOSSology & LicenseDb UX/UI design; UI rewrite in Next.js
Rocket.Chat	javascript, react, react native, typescript	EmbeddedChat 2026 (mobile UX); virtualized lists with TanStack Virtual
Ceph Foundation	javascript, angular, typescript	Ceph Dashboard Carbonization + UX consistency; radosgw admin UX
Processing Foundation	javascript, typescript, webgl	p5.js web editor E2E tests; gamified p5.js learning app
AOSSIE	html, css, javascript, flutter	OrgExplorer GitHub analytics dashboard (2 projects)
API Dash	flutter, dart, react, typescript	UI workflow builder + collection dashboard; GenUI visualizations
Jitsi	javascript, react, react native	Multi-screen support for Jitsi Meet; Document Picture-in-Picture for browser meetings

Org	Frontend tech	2026 frontend projects
Sugar Labs	javascript, react, typescript, vue.js	Music Blocks 4 program builder; Music Blocks performance
CircuitVerse.org	javascript, vue	Mobile app enhancement; Vue simulator integration
OpenMRS	javascript, html, css, reactjs	Native O3 frontend for the Audit Trail
Oppia Foundation	javascript, angular, css, typescript	Re-design the topic page
Jenkins	html, css, javascript	Plugin Modernizer stats visualization; jenkins.io success stories
Learning Unlimited	javascript, html, css	Theming improvements; module management UI
Wagtail	javascript	Guide website revamp; Bakerydemo redesign
webpack	javascript, node.js, webassembly, typescript	New documentation website (2 projects)
Dart	flutter, dart	Flutter DevTools network panel; native memory in DevTools
CCExtractor Development	node.js, javascript, flutter	TaskWarrior mobile app; Ultimate Alarm Clock (Flutter)
C2SI	node.js	CodeLabz; GDB-UI real-time debugging
GNU Project	javascript	Mobile UI for GNU XaoS; GNU Aris UI
Genome Assembly and Annotation	javascript, nextflow	Browser-native genomic search with JBrowse; MGnify similarity-network visualisation
OSGeo	javascript	istSOS web admin: versioning UI, role-based admin
Liquid Galaxy project	javascript, node.js, html, vue, flutter	GeoSaurio; rice farm visualization (Flutter apps)

Org	Frontend tech	2026 frontend projects
R project for statistical computing	javascript	animint2 animated interactive ggplots; nicheR Shiny GUI
Data for the Common Good	javascript, reactjs	GEARBOX trial matching page; data density heatmap app
Open Transit Software Foundation	not tagged	Modernize the iOS app UI; Wayfinder accessibility
Django Software Foundation	not tagged	Dark mode + UI consistency for the issue tracker; Playwright tests
Accord Project	javascript, react	Template logic support for the Playground
MetaBrainz Foundation	javascript, react	BookBrainz internationalization (React)
Kubeflow	typescript	Kale notebooks with a visual pipeline editor
Learning Equality	javascript, vue.js	Accessible multi-select dropdown component (Vue)
Submitty	html, css, javascript	Interactive user interfaces with Vue.js
omegaUp	typescript, vue.js	Performance monitoring dashboard (Vue)
Open Food Facts	flutter, javascript	Open Food Facts Explorer, a new-generation frontend
Open HealthCare Network	react, typescript, nextjs	IM wrapper plugin for Care (React/Next.js)
OpenELIS Global	javascript, react	Frontend modernization with TypeScript
LibreHealth	javascript, dart/flutter	Web-component drag-and-drop form designer
CDLI	html, css, javascript	CDLI mobile app in React Native
The Honeynet Project	html, javascript	GreedyBear dashboard modularization
Open Robotics	javascript	Crossflow diagram editor UI/UX

Org	Frontend tech	2026 frontend projects
MIT App Inventor	html, javascript	ListView redesign + beginner-friendly UX
JSON Schema	javascript, typescript	JSON Schema Studio navigation
Drupal Association	javascript, html	Configuration Navigator for Drupal
Debian	javascript	DebNet bus-factor visualisation
NumFOCUS	javascript	GRASS data catalog GUI
CERN-HSF	not tagged	Constellation web interface
dora-rs	not tagged	dora-studio web GUI
MDAnalysis	not tagged	Simulation progress dashboard
AnkiDroid	javascript	Redesign the deck picker
AboutCode	javascript	VulnerableCode Insights
NRNB	javascript, html, css	openPIP 2 modernization
UN Office of ICT	javascript, css	OG-CLEWS cross-platform UI
Meshery	javascript	Scaling the Meshery ecosystem
Joplin	react, react native, electron, typescript	AI-generated note graphs
Python Software Foundation	javascript	FURY documentation website
BRL-CAD	javascript	OpenSCAD to JS with ManifoldCAD
Project Mesa	not tagged	Mesa-Geo visualization overhaul
checkstyle	not tagged	Website enhancement
preCICE	not tagged	Website migration from Jekyll to Hugo
GNU Mailman	not tagged	Subscription management UI
Pharo Consortium	not tagged	Refactoring engine UI/UX
FreeCAD	not tagged	TechDraw UX overhaul (Qt)
Mixxx	javascript	LateNight theme rebuilt in QML

Frontend in their tech stack, but no frontend project in 2026 (watch these for 2027):

[52°North](#), [DBpedia](#), [Eclipse Foundation](#), [FOSSi Foundation](#), [Gemini CLI](#), [GA4GH](#), [GRAME](#), [Internet Archive](#), [JabRef](#), [JBoss Community](#), [Joomla!](#), [Kiwix](#), [MariaDB](#), [Measurement Lab](#), [MetaCall](#), [Metaflow](#), [Neovim](#), [Neutralinojs](#), [Open Genome Informatics](#), [GFOSS](#), [OpenAFS](#), [OpenAstronomy](#), [OpenStreetMap](#), [openSUSE](#), [OpenWISP](#), [PEcAn](#), [PostgreSQL](#), [SageMath](#), [stdlib](#), [SW360](#), [Libreswan](#), [Typelevel](#), [Uramaki LAB](#).

Source: GSoC 2026 project data via [ketankauntia/gsoc-orgs](#). Projects were matched on frontend keywords, then checked by hand.

LFX Mentorship (CNCF) 2026

CNCF ran 42 frontend-relevant projects across its three 2026 terms. Headlamp plugins, Jaeger UI, Meshery and Volcano's dashboard came up most often. Each project links to its upstream issue, which is the best place to start contributing.

Term	Project	Frontend project	Stack
Sep-Nov	Headlamp	Dynamic Resource Allocation in Headlamp	React, TypeScript
Sep-Nov	Headlamp	Kueue plugin improvements	React, TypeScript
Sep-Nov	Headlamp	Knative eventing plugin	React, TypeScript
Sep-Nov	Headlamp	Kyverno policy visualization	React, TypeScript
Sep-Nov	Headlamp	Velero backup management plugin	React, TypeScript
Sep-Nov	Kubernetes	Headlamp plugin for node-readiness-controller	React, TypeScript
Sep-Nov	PipeCD	PipeCD plugin for Headlamp	TypeScript
Sep-Nov	Jaeger	OpenTelemetry-native query and state layers in Jaeger UI	React, TypeScript
Sep-Nov	Apicurio Registry	Prompt template playground in the Registry UI	React, TypeScript

Term	Project	Frontend project	Stack
Sep-Nov	Apicurio Registry	MCP tool validation	React, TypeScript
Sep-Nov	Apicurio Registry	Federated AI agent search	React, TypeScript
Sep-Nov	Flatcar	Nebraska reporting and metrics	React, TypeScript
Sep-Nov	Volcano	Kthena LLM resources in the Volcano dashboard	Next.js, React
Sep-Nov	OpenEverest	Performance testing plugin	React, TypeScript
Sep-Nov	OpenEverest	Object storage provider UI	UI, dashboard
Sep-Nov	Meshery	Grounding AI in the Meshery Registry	React
Sep-Nov	Meshery	BYOM: adapter for AI and LLMs	React
Sep-Nov	Podman	Website design and UX improvements	React, TypeScript
Sep-Nov	Kubeflow	Pod lifecycle diagnostics in the Pipelines UI	TypeScript
Jun-Aug	Headlamp (Kubernetes)	Headlamp improvements	React, TypeScript
Jun-Aug	Kmesh	Kmesh in the Headlamp UI	React, Next.js
Jun-Aug	Kubescape	SecurityException CRD with a Headlamp plugin	React, TypeScript
Jun-Aug	Kubernetes	node-readiness-controller dashboard	React, TypeScript
Jun-Aug	Jaeger	GenAI trace visualization	React, TypeScript
Jun-Aug	Jaeger	AI trace analysis: Skills framework	React, TypeScript

Term	Project	Frontend project	Stack
Jun-Aug	Kuadrant	Policy YAML editors as interactive forms	React, TypeScript
Jun-Aug	OpenEverest	Plugin playground: UI schema editor with live preview	React, TypeScript
Jun-Aug	Volcano	Scheduler management and log explorer UI	Next.js, React
Jun-Aug	Meshery	Adapter for AI and LLMs	React
Jun-Aug	Meshery	Models support for OCI registries	React
Jun-Aug	OpenTelemetry	UX research for the ecosystem explorer	UX, JavaScript
Mar-May	Kubernetes	Headlamp	React, TypeScript
Mar-May	Volcano	Volcano in Headlamp: job and queue UI	React, TypeScript
Mar-May	Volcano	Docs and website revamp with Docusaurus	React, TypeScript
Mar-May	Jaeger	Jaeger UI routing and state management upgrade	React, TypeScript
Mar-May	Jaeger	AI trace analysis with a local LLM	React
Mar-May	Karmada	OmniControl for the Karmada dashboard	React
Mar-May	OpenCost	OpenCost UI revamp	React, design system
Mar-May	Knative	Educational game web deployment	Web
Mar-May	urunc	CI dashboard and notifications	JavaScript
Mar-May	Cilium	Project pillar pages on cilium.io	Website

Term	Project	Frontend project	Stack
Mar–May	Meshery	Workflow engine; docs migration from Jekyll to Hugo	React

Also part of LFX, but outside CNCF: LF Decentralized Trust (Hyperledger), OpenSSF, LF Energy and LF AI & Data. They post projects on the [LFX Mentorship portal](#), not in the CNCF repo. Source: [cncf/mentoring](#).

C4GT DMP

The C4GT wiki's newest full list is DMP 2025: 74 of its projects need frontend or UI skills. The 2026 list wasn't on the wiki. The 2026 tickets I could see include a [visual-first UX and accessibility redesign for Bandhu \(Beckn\)](#) and MergeShip. Listed 2026 orgs include PlanetRead, Mifos, MOSIP and PSMRI.

Org	Frontend projects (DMP 2025)	Stack
IDInsight	Experiment dashboard and reporting ; AI experiment-setup assistant	React, Next.js, charts
MedPlat	AI dynamic dashboard builder	React, data viz
Education Initiative	Storybook UI component library	React, Angular
Beckn Collective	No-code AI UI builder ; AI catalog generator	React
openIMIS	Migrate frontend from CRA to Vite	React
NUDM (UPYOG)	Public infra booking, citizen platform	React, UI/UX
Tekdi	Saral Next dashboards ; Saral Next core toolkit ; Sunbird framework generator ; content manager	React, D3/Chart.js
Flywheel	Veil frontend	Next.js, TypeScript
ShikshaLokam	ELEVATE admin and org.portal	React
iabsis (HCW)	Admin panel ; practitioner flow ; patient dashboard ; 3 more	Angular, Ionic
PSMRI (AMRIT)	User analytics with Matomo	Angular

Org	Frontend projects (DMP 2025)	Stack
Samanvay (Avni)	Avni website redesign ; QR and signature data types	React, React Native, Figma
Avanti Fellows	College and scholarship predictor	React, Cypress
Sugar Labs	Music Blocks v4 visual programming module and 7 more Music Blocks projects	React, TypeScript, Storybook
Mifos	Gazelle runtime GUI	React or Angular
MetaBrainz	BrainzPlayer + Internet Archive	React
ADC Rohtak	Skill-development course tracker	React
IIIT-H RCTS	Mental-health screening app	React
SEETA / NSUT	8 govtech web3 apps, e.g. GovtInvoice billing	Ionic, React, TypeScript
CMC Ambala, ADC Mahendragarh	Civic dashboards: road tracker , road registry	Full stack, dashboard UI

Source: [DMP 2025 project list](#). Watch the [C4GT wiki](#) for the 2026–2027 list.

Outreachy

Outreachy publishes projects only during each round's contribution period. Its site was blocked from here, so this list is incomplete. Confirmed May 2026 communities: Bioconductor, Fedora (including a Fedora Badges revamp), OpenStack, Servo, the Rust Project and Debian. Wikimedia also runs Outreachy projects every round.

- Full May 2026 list: [Outreachy May 2026 cohort](#)
- Every past project, filterable by skill: [Outreachy past projects](#)
- Next round (December 2026): projects appear at outreachy.org once initial applications are approved.

Summer of Bitcoin 2026

26 orgs: asmap, BDK, Bitcoin Core, **Bitcoin Design**, Bitcoin-Fuzz, Braidpool, Coinswap, ContextVM, **Cove**, Demand, Fedimint, Floresta, **Flotilla**, **Formstr**, **Jam**, Kern, Krux, **Mostro**, **Nostr Components**, Nostream, SeedSigner, **Shopstr**, smite, Stable Channels, strfry and VLS. **Bold** = orgs with a user-facing app or web UI, so the best fits for frontend. [Source](#).

MLH Fellowship

There's no public project list. MLH matches each fellow to one of 100+ projects a year during the application. [Open Source track](#) · [Partners](#).

ESoC (European Summer of Code)

2026 projects: pixi, pgmpy, pykalman, pytorch-forecasting, rattler, scikit-base, shap, sktime, skpro, OpenML and AI-on-Demand. None is a frontend project; the only web work is on docs sites. [esoc2026 repo](#).

Coverage

Program	Coverage	Gap
GSoC	All 185 orgs, all 1,140 projects of 2026 checked	None
LFX (CNCF)	All 3 terms of 2026 checked	Non-CNCF foundations (LFDT, OpenSSF, LF Energy): check the LFX portal
C4GT	All 2025 projects checked	2026 list not public on the wiki
Outreachy	Partial	Site blocked from here; use the cohort page
